A 1.83Ghz Yonah is faster than a 3.2Ghz Pentium, right :) Merom, Conroe and Woodcrest all use Intel's new Core Microarchitecture (a little confusing: Core Duo does not _not_ use Core Microarchitecture, it's essentially an improved Pentium III. Core 2 Duo chips use Core Microarchitecture). All three chips produce the same performance at the same clock speed. The cache size can make a difference, but Conroe models starting at 2.4 GHz all have a large 4 MB cache. So a single 2.66 GHz Woodcrest will be substantially slower than a Conroe 2.93 GHz. The 2.93 GHz conroe is extremely overrated and unlikely to be used in any Macintosh. I personally would expect 2.0Ghz Conroe, 2.66 GHz Conroe, 2 x 2 GHz Woodcrest and 2 x 2.66 GHz Woodcrest for a wide range from cheap to maximum performance. deadly kombat 9 mileena radleywotsonSep 1, 12:08 AMGorgeous. Anyone who has been interested in cars or driving should try this, it's sublime attention to detail is amazing, one of the most beautiful interface I've ever seen. deadly kombat 9 mileena Oh, look. Woot! has a tablet today. Spiffy! deadly kombat kombat mileena take everything east of Kansas and I will be taken the western region of the U.S., when we have enough money, I can go raid Asia and Australia/New Zealand for the old G5s and you can go after Europe and the Middle East, when we're done we'll be rich and could sit on the same oil plate as bin laden, dick cheney, and more of the Bush family members and based on who's taller, one of us could be bad dr. and the other will be my mini good sound? Damn and I wanted Asia... ahh, but Europe wont be too bad. Damn I'm 5'7, so I can finish with the short end of the stick. deadly kombat 9 mileena sharytpantsApr 6, 10:33 AMWow, Intel is really keeping up with processors. One day I imagine Apple will make a 15 MacBook Air and call it a MacBook Pro (maybe not as thin, but thinner than current MBP). deadly kombat 9 mileena I just ordered a :(It wasn't supposed to be delivered until Monday, but it was shipped early :(If the rumors are true. will I be able to send him back and get the new one? Does anyone have any experience in returning unwanted things to Apple as time is not on my side (leave for uni on September 16) deadly kombat 9 mileena Final Cut Playmobi! for roller editors made me laugh ... then he made me cry... New Mortal Kombat 9 gory photos I'm sure the GPU will also be hit, at least. MBP will probably also see some things that MB has as a user-removable hard drive and magnetic lock. Cpu and GPU alone make it worth getting a new one, THE O.I.O. I agree. The practical differences between Core Duo and Core 2 Duo in real-world tests are small. But a serious cuckoo to GPU, HD, and other improvements that you certainly mention would make the upgrade worthwhile. I just hope Apple joins the rest of the manufacturers in this mass announcement. In that case, I wish you didn't think differently. I hope you're right. I'd love to buy a MBP next week. Expect new merom-based macs, and a new iPod, on September 18th. I guess you're right, but I hope you're wrong. I would love to get a new MBP in the next two weeks before my next international trip. But at your point, I'm not optimistic. deadly kombat 9 mileena doctor-donApr 27, 10:45 AMI thought looking at the histories of my location was interesting. I also have no illusions that can not be traced (mobile phone, purchases of credit cards, etc.) I wonder if all paranoids realize that any GPS camera encodes the information in the image. Share your photo online and anyone can get metadata with your photo location. If you want to be connected, you can't really be anonymous. You want to be anonymous, sell your computer, smartphone, cut credit cards and move into an undocumented shack in the middle of without utilities. Camera images do not contain GPS data if we have disabled this feature. deadly kombat 9 alternative jade If there is an indisputable fact of this world ... The ones on Boards that say they hate Best Buy, are the first to grab ads on Sundays and visit the store at least weekly. Bank on it. deadly kombat 9 mileena [Size ~1] Very fact that the gingerbread source is available gave my Orange UK brandED KITE Blade Gingerbread before other phones had officially builds. Could you re-write the sentence so that you have a subject and a sermon? deadly kombat 9 mileena mashinheadAug 20, 6:25 PMYeah, now all we have to do is be able to allow it. I wonder what the price will be for Tigerton or Clovertown. yes, that's what I want to know. Because now I have a dual-core powermac. I'm interested in this Mac Pro now, if I have huge upgradeability options in the future, and also depending on the price. I can wait until January, but if all that's going to happen until then is that there will be a 1K bito clovertown/Kentsfield BTO, I probably couldn't afford that anyway, and I don't want to wait, but if they're going to upgrade everything to the octo-core chip and prices are around the same, even if they go up, I'd expect it. Featured on: Mortal Kombat I hope apple follows Microsofts leads and allows students upgrade for \$30 in the first few months of release. The only reason I upgraded from XP to windows7 was student discount. It would be very nice if I could do the same for the lion, otherwise SL is probably gumna be fine forever. What happens if you skip the versions. Will it be the same price to upgrade from Leopard as SL? deadly kombat 9 mileena If you look at the banner images from WWDC 2006 you can see that PowerMac/Mac Pro still looks the same... That means that Mac Pro will look like PowerMac or that there will be no version of Mac Pro at WWDC 2006... ? deadly kombat 9 mileena AidenShawMar 26, 11:41NU enough, W7 is still based on Win NT technology, dating back to 1993. OS X is still based on UNIX, dating back to '69. Zing! Thank.... The only time I would be delighted, literally, about a major version is if they went to an operating system that was slated to be described by canines. Canine would mean it smells bad (especially when wet), and is without pride, and is essentially stupid, but can learn tricks for kibbles. yes, get OSX Pooodle. deadly kombat 9 mileena likemyorbsMar 5, 3:45About as logical as Concerned Women of America. Somehow you start to recognize the rights of gay families under government and men will lose all interest in women, even alter! (Unfortunately, this is a real screen grab of their site today -- they are not homophobic at all, really...) That.... Is..... Hilarious. As if the bride didn't know her husband was gay when he had a picture of his boy toy on his bed post before having sex with her. Then again, if they are religious I think they had sex before their wedding date. deadly kombat 9 mileena Mr. RetrofireApr 6, 07:54Let me be clear - FCS needs a robust feature blu-ray author. Useless without reference correction error No one has seen this reference hardware or drivers for it in the Apple environment. Only a few specialized companies use expensive reference hardware for true BD-author. It is the same situation as on the Audio-CD market. BTW, Sonys BluPrint 6 (software costs US\$80,000 software. And this is just software. I don't think we'll see similar features in FCP or FCS. deadly kombat 9 mileena a rather disappointing car list.. what gives with no one newer model from VW than 2005? almost any new alfas, not Audi A1, A5, A7? not fiat 500 abarth? generally having old models instead of new ones to European car makers? apart from lambo and Ferrari a few classic cars from European car makers added? so they neither added old cars and almost no new European car, but instead mostly kept models of cars from 1998-2004 ... a great disappointment I actually have to agree with this. There are somewhere around 1000 cars on the list, and some of the choices are confusing. No Series V Cadillacs (only 1 Cadillac total actually), but there is a ton of from Nissan Skylines. Hopefully they'll fill in some of the DLC list, but then there's the problem of pumping more money into a game for content that should have been included from the beginning. I still have pre-ordered and very much look forward to it, but the list of cars is a little confusing and disappointing. His old alternate outfit, citizenMay 22, 6:54 PMAs others have pointed out, the killing of a peaceful protester (or non-innocent civilian for that matter) is never justified. I'm not trying to justify it. What I'm asking is, does it justify the action we're taking? That. I'm not sold on New Apple Mac Pro Dual Quad Dual Intel Xeon 9400 Quadro processors at 3.4Ghz (2 x 4 core) 2GB Buffered DDR2 RAM 750 Gb SATA2 Hard drive Blu Ray Super drive 2x Regular DVD rum in the second bay ATI X1900 512MB PCI express x16 3950 That's exactly what I want. I have to get a promachine before I move in August. Does anyone see a potential for a security breach with the iChat feature that allows you to take over someone's desktop? (the goal is, of course, to collaborate or to help them solve a problem) undontsurf9Jun 23, 09:02 AMgot my call here in Houston, TX. They said it would be ready at 8:30 Thursday morning. Despite what was said to all of us in advance, based on the eligibility upgrade after December 2010, a new iPhone will cost me \$600. She comes up with no commitment, which is fine. I'll get the new iPhone next year at a discount. So I need that \$247 store credit to bring pricing down. I'll go to the store today. The kid over there is me so far and I think it will help me to take the phone on opening day. Still muttering about this whole ordeal, plus the fact that no one is getting white phones. I just want a cell phone that works. all these phones today (of all these phones i Motorola had, so Maybeby Motorola just sucks) have this ridiculous amount of latency when you are browsing menus. because he's got to have all this fancy crap around. its like phones are using the same technology from 5 years ago, but they are just piling these features into them so they dog down. Today's overall phones seem to suck just a little. My nokia 8260 was the best phone I ever had and was monochrome with no camera or video or stupid nonsense like that... plus it seems that my ability of phones to get reception when inside a building has become worse in time too. I used to get a good reception inside my work, but now I don't. and it's the same building. So, all in all, just give me a phone that works and works well and I'll be happy. I agree simplicity is everything! Knowing Apple, I hope the iPhone will be simple and slick. That's all we need.
